

BioScience, one of the three business groups of Bayer CropScience AG, is a leading international player in research, development, and marketing of seeds. BioScience provides sustainable, plant-based solutions for the agricultural, health, nutrition and industrial sectors mainly through modern plant breeding and plant biotechnology innovations. Innovation is focused on three market areas: vegetable seeds, agricultural crops (canola, cotton and rice) and novel plant-based products for health, nutrition and biomaterial applications. BioScience has more than 2100 employees worldwide and is headquartered in Lyon, France.

Bayer BioScience N.V. located in Gent, Belgium is one of the main global plant biotechnology innovation centers of Bayer. This center of excellence integrates plant biotechnology research and BioScience business support functions to optimize the innovation process in a responsible and sustainable approach.

For our **BioAnalytics** department in **Zwijnaarde** (Belgium) we are currently looking for a motivated

Quality Manager (m/f)

Job description:

The successful candidate will be expected to lead a group of 7-10 scientists and technical staff responsible for laboratory quality assurance (GLP, ISO and internal standards) and third party relations.

In addition

- The quality manager supports the BioAnalytics and BioScience staff in their choice, implementation and maintenance of quality standards such as ISO, GLP and other internal standards.
- He/she assures BioScience-wide acceptable and harmonized laboratory quality standards, including developing procedures and guidelines.
- He/she ensures quality management support for internal and external audits.
- He/she facilitates acceptance of Bayer BioScience dossiers and data by application of quality standards.

Profile:

PhD in Life Sciences with 5+ years of quality management experience, preferably in a lead role. Knowledge of molecular biology and biochemistry with sound experience of laboratory activities. Strong affinity with quality management systems and information management
Team leadership
Excellent interpersonal skills – Able to manage cultural diversity – Good communication skills
- Bilingual (English, +)

Offer:

We offer a competitive salary and benefits package and an innovative environment. Our teams are amongst the best in the industry. Teamwork, entrepreneurship, drive, a passion to learn and to share knowledge, respect for sustainable development and integrity are our most precious values. Our international and interdisciplinary work environment offers a range of possibilities to motivated, qualified people with excellent interpersonal and organizational skills.
