

ISTA Statistics Committee and statistical seed testing tools

Kirk Remund

R&D Senior Science Fellow & Statistician, Bayer Crop Science

Chair, ISTA Statistics Committee

The ISTA Statistics Committee has strong collaborations with the technical committees of ISTA and also seed testing professionals around the globe. These efforts have results in several very useful statistical seed testing tools, many of which are available on the ISTA website for all to use and benefit from. A brief overview of three of these very useful tools is shared in this talk along with some significant theoretical contributions of the committee.
