

Dormancy breakage for germination testing

David Johnston

Vice-Chair of the ISTA Germination Technical Committee, Louisiana Dept. of Agriculture and Forestry, Louisiana, USA

Abstract

When attempting to determine the germination potential of seeds, breaking dormancy in seeds can be one of the greatest challenges for analysts. This presentation will briefly discuss the various methods used in breaking seed dormancy that are listed in the International Seed Testing Association's (ISTA) "International Rules for Seed Testing" Table 5A.
