F. SPECIAL PROJECTS				
project title / subject			proposed	collaboration
collaborating committees			finalisation	
1	Scientific Names Database, currently in proposal stage to develop scope and coordinate with programmers, for presentation to ECOM in February 2026. SHC may collaborate to provide data for seed pathogens. All TCOMs with online/digital resources that include scientific names will need to check entries for their resources.		TBD	
2	Scientific name evaluations, to discuss names that were proposed for addition to the List of Stabilised Plant Names by the Brazilian federal seed lab but not included in the 8 th edition. Certain names within the Stabilised List will also be discussed for potential changes in the 9 th edition. Requests for seed evaluation to distinguish some groups (e.g., <i>Prosopis</i> vs. its segregate genera) will be sent to PUR or other applicable TCOMs. This will be an ongoing project for NOM to support the List of Stabilised Names.		ongoing
