	Program Items	proposed finalisation	collaboration
	1. The website will be reprogrammed	Dec 2025	
1.1	a) e-form to enter images (seed, seedling and/or tetrazolium) b) e-form to enter new or updated protocols		Web Developer ISTA Secretariat
	c) House and manage the master sheets • Nomenclature master list • Common names master list • Species with rules master list • Species on the master list that have images master list • Purity master list • Germination master list • Download all images of seeds and pull in the synonyms from WFO and the common names from the common names master list	Dec 2025	Web Developer ISTA Secretariat
1.2	Seedling description sheets by family or subfamily as needed for the web site protocol	Dec 2025	
1.3	Tetrazolium worksheets created on a family basis need to be made. The goal is to catch up to the seedling evaluation sheets.	Dec 2026	
	2. Develop chapters with invited authors		
2.1	• The purity	May 2026	
2.2	• tetrazolium	May 2026	
2.3	• seed moisture	Dec 2025	

2.4	• x-ray	May 2026	
2.5	• Germination	May 2025	
3.	Develop protocols for species on the nomenclature master list or regional species	May 2028	
3.1	Author/submitter of protocols or images for the gallery training	Dec 2025	ISTA Secretariat
3.2	Protocol approval training for each committee member	March 2026	
3.3	Determination of PSD/PSU on new families or genera	May 2028	
3.4	Determination of Seedling Evaluation on new families, genera	May 2028	
3.5	Determination of TZ on new families, genera	May 2028	
3.6	Each member on the WSC will look for wild species in their regions that are on the nomenclature master list or in a region not on the master list.	40+ species protocols May 2028	
3.7	Also, if a species on the master list is in the region but does not have an image, find some seed and either take and image, or find someone who can.	20+ species images May 2028	
4.	Develop other authors for drafting protocols in the region	May 2028	
	WSC member will be the regional coordinator
